Gallagher Construction, LLC was founded in Bridle Trails, WA, in 2013 and is a full-service residential design/build remodeling company. We are founded on the principles of being client-focused, quality-driven and community-based. We understand that our business exists because of our clients and strive for every engagement with our clients to be based on trust, integrity, transparency and quality execution of projects. We are founded on the premise of being accountable and believe firmly in the give and take of the relationships we have between our clients and our small business. A contractor working inside a family's home is an intimate relationship and we understand and value that trust.

In our design process, we create the prototype of the project and work through details of the remodel together and we enjoy building this relationship and getting to know our clients and their families during this time. We strive to build a bond of trust and then give our best effort to execute a quality project based on accountability, knowing that it is a two-way street with our clients when it comes to communication and ownership.

Gallagher Construction, LLC is community-based and supports our local schools and organizations. Our business “marketing campaign” consists of contributing to the Cherry Crest Elementary School Art Auction as a Gold Sponsor. We are also lead sponsors with Bellevue East Little League and the Bellevue Farmers Market. We believe in helping and giving back to our local community and do any type of work, large or small. We are in the service industry and are here to help with any project from repairing dry rot, replacing a window or designing an award-winning whole-house remodel and addition.

All of us at Gallagher Construction, LLC believe and are passionate about what we do with our service to the community and we also value our relationships with each other. We enjoy a healthy work/life balance and many of us appreciate spending time together outside of our work in the form of skiing and snowboarding, company lake retreats at Jim's Mason Lake cabin, bike riding and enjoying concerts together. We love and appreciate where we live and feel honored to be able to serve the community of Bridle Trails and the greater Bellevue area in any way possible with their home remodeling, repair and maintenance needs.
