

# Organic By Design Part 2, The Interior

project of the month

The style of the interior of the home is craftsman, but the intent of a beach house feel pulls through by incorporating white-washed T&G vaulted cedar ceilings, white-oak wide-plank flooring and a color palette of whites, greys, blues, and greens. Also, the multiple sets of paneled doors and window bring the Bridle Trails forest in and demand outdoor living as a priority.
